

PROPER and INCORRECT Trail Camera angles for Jackal

NO !!!!!

www.africanpredator.com

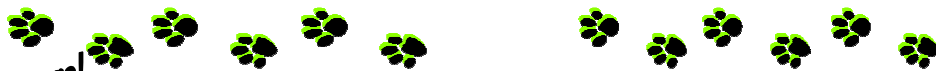

YES !!!!!

www.africanpredator.com

Sun setting behind camera!

www.africanpredator.com

FOOD BETWEEN ROCKS, harder to remove, more photo time!

Active more at Sunset than Sunrise

Camera to bait 5m

Camera hits ground at 15m angle

Angled camera allows for a long time span to get lots of photos. NEVER place directly facing a pathway, the animal will walk past before the camera fires!

Sun MUST go down behind camera placement, **VERY IMPORTANT.**
