

# INFRA RED LENSES

Now on sale, no longer do you need to purchase imported infra red lenses, we make them up personally in South Africa, I have been working with night vision for a good few years now, and know first hand the prices of imported lenses, and most of them are a total rip off with the price tags attached!

SO! Vir jakkals jag en INFRA RED filters is ons nou reg!

Now we make them up at Feather & Fur, in South Africa and make them according to your light diameter. We did scientific research and developed an Infra Red lens BETTER than imported lenses, and cheaper and it allows you to see much further than what you would see with imported lenses.

## PRICES

You give me your light diameter you want and I will make you an INFRA RED lens to fit your specific light. We will only manufacture a filter after payment is received in full.

20cm and less R450-00 + courier and packaging R120-00  
20cm to 50cm R650-00 + same as above

**Feather & Fur is NOT liable if the sizes you send us is not correct we will NOT re cut and develop another lens for free, nor will we sell it on your behalf, so make 100% sure of your light diameter. NOTE; these lenses cannot be used on a normal light to shine red at night; these lenses are only useful if you are making use of night vision equipment. NO REFUNDS WILL BE ENTERTAINED.**

I make up these lenses personally; call me on 0824853885 during office hours Monday to Friday 8-5 at the factory. We are closed weekends and do not take any calls after hours
