

NEW HAND CALLS - 2011

New for 2011 is a variety of hand calls. These are the best hand callers made in South Africa thus far, excellent quality and **top class craftsmanship.**

Simulated Ivory / Bone Jackal / Lynx calls

The **CUSTOM CALLER** is ONLY made to order, I personally make these up, and the total call is South African made, simulated Ivory / bone. Each call like this takes about 3 hours to complete and is made by hand. If you buy this call and you are not happy I will refund your money, because they are awesome! It is far superior to most imported callers available today. **R450-00** – As I say if you buy it and you don't like it as it isn't good sounding I will refund your money, what have you to lose! I will even pay your postage!

The **JACKAL LYNX FOOD CALL** is also totally made in South Africa by me, again it is simulated ivory / bone and makes really great sounds. Again if you don't like it I will refund your money. This item is also only made to order as it is a caller that takes a few hours to make up. **R450-00**
The cost is more than average but it is a personal item and is made one at a time, no two are alike.

The **CAT KILLER** has been with us for many years and has many references, see our website! It is simulated ivory / bone and again it is top quality. **R395-00**

The two food calls in red and blue are basic distress calls, and each cost **R395-00** – the long range is a great rough sounding caller.

You can buy cheaper predator calls mass produced, but these are custom made and each one hand made, and the end product is top class – prove me wrong!

We also make knife handles-

TOP CLASS CRAFTSMANSHIP

If you purchase this caller and you dont like it I will refund your money! these calls are simply stunning!

TAKE NOTE;

If you have a specific design / call you want made, with the knots or cuts on the texture draw an idea and mail it to me, I will make a call as close to the drawing as possible, nothing is impossible. I am available during winter months more often than summer with the call making, but if you have a specific style of a call mail it to me, I will not charge more to make a specific design. Custom call making takes time, so don't expect it back the next day.
