

# ROOIKAT CAGE TRAPPING OUTLAY

Here is an outlay for you to follow when trapping, if you have a few cages go by this rule and it will help, remember always follow the line of cover – dekking is the key!

This side is open ground, **don't work this end**, cats will travel walkways through cover, through the tree line, set out cages around the likely travel route. As shown in RED. Ideal amount is 6 cages. The U of cages must be about 120m in front of the dead sheep.
