

”Jakkals Jag Cable Ties”

This is a simple thing, it may help the guys who hunt, some people know about these and **MANY DON'T!**

**CABLE TIES
THAT
RELEASE**

www.africanpredator.com

These cable ties don't hold fast and that's all, you can release them afterwards and then use them again, very versatile.

You can use these to hang up dead jackals, and just general stuff like holding battery leads etc, it has many uses, they sell these at electrical shops.

Here is my high lift jack that I hold with a release cable tie, it has many uses.

This may be a stupid thing some may think, but many people don't know you can buy these that release again; they are strong and can hold a lot of weight, anyway, hope this helps. Sold at electrical shops, cost about R15,00 each.
