

# OFFENDING WEBSITE

## SA SITE

Please take note, neem kennis; we have been informed by persons on another website and by people who have visited the site that some of these people take pleasure in slandering **AFRICANPREDATOR.COM.**

-----  
It is written that on one instance a specific person by the name of Marie (*sic*), that he in his own words” pasop, ek het my vingers lelik gebrand” when speaking about the quality of our items he bought, **items he never bought.**

I would like to clarify that this person has never bought a thing from us and I challenge him to show a receipt of items he bought from me in his name, he will not be able to do that, as he and others on this site are getting kicks out of talking down and even as one person puts it, “I am rubbish”.

This person has never met me; it makes me sad that people will try discrediting others just because they feel like spitting out garbage, and because of jealousy have gone this route. I challenge him to put a copy of the invoice for the things he bought on the website, big talk as he is, he is a liar and clearly suffers from his own small town mentality.

I am pretty sick of these small minded people - it is a pity none of them try to manufacture and market what we do, instead of sitting behind a computer, with no stones spitting out garbage.

We have been in business over 25 years now, and if our items are so bad how come we have no competition and are still around on this planet, we introduced a SA made digital caller last year and the quality is the same if not better than imported ones in many respects, but to them it will still be junk, as **they are so good at criticizing...but not developing.**

They chose to mention that we are like a Verimark advert with all our giving away of free items if you buy something, it is all called marketing, and if our site offends others then simply don't look at it, it is amazing that they have chosen to slander our business and say its so bad but all of them visit our site **OFTEN!**.....

**It is amazing that you can go visit a person, on our arrival take his family gifts including his son gifts, and to him give camo apparel, the latest (then) TNT laminated imported predator calls, an entire range, Natgear camo, about 10 imported VHS calling videos or more, other callers, and a box of all predator related stuff and DVD's and cd's, pay your way, pay his fuel, pay for food while living at him, taking them out to supper at a local bar, and then have him and his son stay with us when they passed by the Cape when we lived there, but he will slander us on the web, claiming to burn his fingers and that our products are rubbish, when he never bought a single item from us at all, amazing how a person can go so low - I bet he never told his friends on the forum all this! And also that on a hunt my client filmed footage that we all agreed to try market to sell to an**

American company in exchange for specific items, and I negotiated with them keeping this guy and his brother informed all the way, all mails etc was forwarded to him so they could see exactly what was happening and we all agreed to equal shares, I made sure we all got equal, being honest and open, but again now I am slandered... I wonder if he tells his friends all this also.....

I am so sick of people like this who sit behind computers with no stones who spit such crap out to the public who don't know the story, the true story! I could mention other things here also that will really shock people about a specific person on this so called forum, but I will not get into that.

This is just to warn and explain my side of things, another person wrote, they paid money into our account and had to fight to get it back after we had it as it was paid to us by mistake.

Again they fail to say it as it was, they paid me money and it was not for anything, he paid in my account by mistake, his partner called me, and I told her I am back in a week from farm and will pay her, 5 days later at the end of that month I paid them the money on my return, he never had to fight at all, but again seems people on this forum seem to like slandering us.

Simply it is called jealousy, as they don't have what we have, and also because we offer tons of info for free, other people share zilch and you must buy it on e books and stuff...so here we give things away and that's still a problem to them, and they say we look for ways to make money out of you, mmmmmmm maybe they should look around them..(The Verimark remark) – this is just another person with an axe to grind – and also because we are not one of the manne, BUT If I sent them all free digital electronic callers they will all praise me, and say to all their friends, BUY Gary's stuff it's great!" but because we are not one of the manne, they decide to slander us, people saying don't buy his stuff when they themselves have bought nothing at all and have not seen the

quality themselves. Another reason why they dislike us is because we are English and not Afrikaans, and this is a problem, there are a lot of issues between English and Afrikaans speaking people - **shame get over it! Not saying all do, but some have issues about that for sure, seem to think Afrikaners are superior to English people. You can sukkel all weekend to speak Afrikaans at a farmer's farm out of respect and the Afrikaner will not try at least to say one word in English...seem to have the attitude of "wat weet hy, hy is mos n Engelsman"** you may not like these comments but they are true! I have been around long enough to know what goes... again not everybody is like this but the majority are that I have met.

Anyway, as I said before **BULLSHIT BAFFLES BRAINS**, so if you decide to look at a local forum be aware of the attempts to discredit us, to those who claim our items are junk, why did you never complain? Call and want a replacement or refund??? Simple- because you bought nothing, and if you did the show me the receipt as I give receipts on all sales! **You people wanted to start a war, so I will challenge and retaliate its simple, I am pretty sick of this crap now.**

Just for the record, I have sold lighting, lenses, chairs, cages, hand callers and till TODAY I have never had any complaints, been selling it for years, funny nobody I know has "lelik hulle vingers gebrand" a local hunting magazine reviewed my stuff a year back, strange that the writer could blow my calls, and with success also, and that he said they are equally as good as imported ones and worked for him, but on this forum as usual the stuff could not make a sound.... Another thing that puzzles me, is that the forum when you read the comments it is always the same old small minded people who complain, a small click of them with agendas and big axes, sitting in a circle with nothing to do but spit of crap and bring down a person they don't even know, amazing that they never get tired of showing the others that they clearly have an axe to grind..... they even seem to find it a problem that we

give free gifts away, it must be hard for some people to look at themselves and wish they could work and manufacture stuff with their hands, instead they hide behind a computer, slander you, discredit you like the cowards they are.

But again if I was to send all the moaning forumers one of these calls and a nice digital electronic on that forum, I would be the greatest, they would praise me, but because I am not one of the manne I am an outcast, shame man..... jealousy and denial are two of the worst diseases to suffer from.

As I say if I gave them all some of these callers I would be the greatest thing since sliced bread, but because I am not one of the manne, it will always be crap and they cant blow it, but everybody else can.....

These hand calls will compare with the best imported callers on the market today, make superb sounds and as I have said on my adverts, and again I will say it, if you don't like them or so, I will refund you your money including postage..... Funny, so far I have never had to refund anybody.

And again to the people on that forum, if I had to refund anybody show the refund slip, again nobody will show a thing as all they are - are individuals with large axes to grind.

**This model I make at right will compare in quality to any American caller.**

**In my time on this earth I have met people from every walk of life, including people like this that are all talk, they cannot face you head on instead slander and spit out rubbish about you, but the wheel turns somtimes slower for others, but it does.....**

**be careful of this SA forum.**

This is why I dont have a forum on my site, to many people with nothing to do, but bitch and talk crap about other people, talk about the same old thing on a forum except they address it in about 100 different ways, people who pass down judgement on people and things they have never seen or met and are bored with life, it must be hard to be like them.

## VARMINT CALLERS & TIPS

Over the years, well-known professional varmint hunter Gary Laubscher of Cape Town has been manufacturing and marketing a number of game callers. His latest open-reed, hand-held callers are similar to those so popular in America before varmint hunters began using recorded calls to lure varmints closer.

Although much use is made of CD players today, there are still many situations that call for a little hand-held caller. A few weeks ago, Gary sent us a number of hand-held callers which seem every bit as good as those produced in America. Some of Gary's callers are meant for close-range work while others produce louder and 'rougher' distress sounds for long-range work. His 'Cat Killer' caller produces squeaks and squeals that caracals should find hard to resist.

Although Gary makes his good-looking 'Custom' Predator callers only on special order, they produce the same

sounds as his  
ard' open-reed  
ers. I prefer t  
caller (extrem

**VARMINT CALLERS & TIPS**

Over the years, well-known professional varmint hunter Gary Laubscher of Cape Town has been manufacturing and marketing a number of game callers. His latest open-reed, hand-held callers are similar to those so popular in America before varmint hunters began using recorded calls to lure varmints closer.

Although much use is made of CD players today, there are still many situations that call for a little hand-held caller. A few weeks ago, Gary sent us a number of hand-held callers which seem every bit as good as those produced in America. Some of Gary's callers are meant for close-range work while others produce louder and 'rougher' distress sounds for long-range work. His 'Cat Killer' caller produces squeaks and squeals that caracals should find hard to resist.

Although Gary makes his good-looking 'Custom' Predator callers only on special order, they produce the same

sounds as his 'standard' open-reed callers. I prefer the small caller (extreme left) and took it on a hunt in the Karoo. I didn't get a chance to call in varmints, but I did try it for something else – calling in steenbuck. At times our steenbuck and duikers seem compelled to investigate the distress calls of a 'rabbit' or a small 'lamb'. At other times, steenbuck rams can be difficult to call in; so I tried to lure a steenbuck in.

We were hunting an open plain covered in a variety of knee-high Karoo bushes which, according to the landowner, held a good population of steenbuck. The wind was really pumping and nothing moved, so I was not expecting much action. However, after taking up position and waiting a few minutes, I started calling gently, trying my best to sound like a steenbuck/duiker lamb in distress. Less than a minute later a steenbuck's head popped up about 120m away and a few seconds later he started trotting towards us. He stopped at about 75m and then circled to get the wind in his favour. The little ram advanced to about 50m

from us before catching our scent and taking off at high speed. As he circled to our right he stopped several times and I could easily have shot him.

Gary also markets a DVD in which he reveals a number of 'secrets' that professional varmint callers use. The DVD is not a how-to-hunt-varmints instruction for beginners – it is for those who already know the basics but want to learn more in order to increase their success rates on jackal. These animals are incredibly clever and the useful tips given in the DVD will certainly help.

For more information call Gary on 082-485-3885 or email <sellis@telkomsa.net>, or visit <www.africanpredator.com>. Koos Barnard

When I grew up, I had no brothers and sisters, all the company I had was adults so maybe I grew up better and faster, maybe these slanderous people had sisters, brothers etc and had more childish company when young and till this day still have not grown out of it, with childish and petty remarks..... we can be glad not all of us are so small minded and many of us grow up faster except this bunch of fools... the others on this so called forum must often wonder why they dont give it a rest, seeing its always the same small hive nest creating a buzz.

**Be careful of the BBB thingy..... Bullshit Baffles Brains.**
