

## AFRICAN PREDATOR RED LED HUNTING LIGHT

The light can unscrew to reveal the charging port, hold the light as shown in this photo, the front up to the round screw thread, hold all and then with the other hand hold the back part, unscrew the thread and reveal the charge port.

I charge my batteries in the other charger, I don't charge batteries in the torch, just in case a battery leaks or so, it is safer, but this is the port access.

**DO NOT UNSCREW THE THREAD to gain access to the port totally, just enough to reveal the charge hole.**
