

NEW HUNTING LIGHT NUWE JAKKALS JAG LIG

Rooi LED Jakkals Jag Lig, 12V is oud, die nuwe ligte is LED en baie beter! En hulle gooi ver op 'n donker maan.

The RED LED light will enable you to shoot to 300m at night with a good rifle scope, it also has a built in side port to charge the battery while in the flashlight and can be connected to a car 12v charger also!

KIT IS AS FOLLOWS;

- Car Charger
- USB charger / connector
- Home charger / connector
- Battery holder
- ON / OFF Pressure switch
- Rifle Scope Mount **FREE**

Battery optional if in stock

I have marketed and supplied these lights since 2009, they are really awesome lights, in a class all by themselves, no other light will compare in South Africa today, unless the red light you buy has our logo on it in this model, it is a fake.

The kicker is our light can charge via a built in charger on the side either from you car 12v socket or at home, no other rifle mounted red light in South Africa will offer you that feature that runs from a 3,7v battery.

DON'T be fooled by the size, it throws very far at night and has NO extra red filter that cuts down your range at night.

Here is the total package, scope mount **FREE**, light, pressure switch, chargers, battery holders and adapters for home or the car, or the USB on your computer.

All neat and ready to work at night - an awesome hunting package.

PRICE

R2, 180-00

Example of side charger, just unscrew the torch body to reveal the charging port.

Happy hunting! - Don't be fooled by the size, it will blow your mind when you see how far you can shoot with it at night!

GENUINE LIGHT REFERENCE

Hi Gary

Duisend dankies, die lig is regtig fantasties kan sê briljant! Hy pas perfek op my ou .222 tje en die Leopold teleskopie, kyk 300 meter soos 'n droom, en baie dankie vir my Lint hasie, as jy maar net weet ek is verslaaf aan chocolates! Hoe lank moet mens die battery charge?

Groete Jannie

Pleasure, I try hard, probeer om goeie diens te gee aan almal, en wat jy bestel het is die beste liggies in SA, genuine. ek sal jou nou se as jy met hom getoets het op jou geweer gaan jy nie meer met daai groot lig op jou stoel skiet nie, daai klein liggie baie beter jy sal sien, and you will be very surprised. I sell a lot to Namibia, baie van hulle daar verkoop, beste jag liggie wat jy kan koop. Sit net n exhaust pipe op soos in daai photo sodat jy niks blink "[glare](#)" terug kry van geweer se loop nie. Groete, G
