

BASS FLIES – Predator fish fishing!

A black bass that took my home made fly, awesome to catch bass on light tackle trout rod and line, I like a 5-6 weight rod and line.

Make them yourself, and quick, in fact you can make them at the water's edge, it takes about 2 minutes, and you will love fly fishing for bass, awesome fun. I put together a few the day before, use a few strands of a duster, and a few pipe cleaners and done! Simple. JUST make them look like food, and jerk the fly in the water to create movement, bass won't resist it!

Take the hook and lay on the colour material, wrap closed with cotton, apply a layer if super glue, then roll the end with a colourful pipe cleaner and fit an eye, done!

SIMPLE!

The fishing videos are on my Facebook page

SIMPLE AND EFFECTIVE – GREAT FUN!

Made by Gary Laubscher – simple and fast to put together, but they work well!
