

# “GARMIN E TREX”

The ultimate GPS for **NOT** GETTING LOST!

I was calling a place in Merweville, we had to go from the farm house across unfamiliar places and through koppies etc to get to an open flat pan, we covered over 3 kilometres in total that weekend, and without this GPS we would never have found our way back home, I have written an article **before** about this unit, *but it deserves praise again 10 years later!!!!*

<http://www.africanpredator.com/Garmin%20E%20Trex.pdf>

A simple to operate unit that leaves a breadcrumb trail so you can find your way home, the nice thing is **IF** you put **off** the unit **without** saving your trail it will **still** show you the way home when you put the **unit back on!**

**Grab one of these if you need direction!**
