

# JAKKALS JAG ROOI LIGTE

## NUUT VIR 2016-2017

ZOOM / FLOOD / KOL GOOI - ADJUSTABLE BEAM

We have marketed these lights since 2009, the previous models did not zoom, and these throw a spot, flood or can be set at any light diameter out to full flood.

They can be ordered with a pressure switch for remote on and off setting, and the lights come standard with a mount for tactical applications.

We lathe manufacture an extra 30mm scope mount in accordance with your 25mm or 30mm scope tube that you use on your scope.

The pressure switch is shown in the above photo as well as the standard scope mount supplied that fits universal tactical mounts.

Since 2009 we have sold our personal logo engraved hunting RED LED lights, they are by far more superior to 12V huge rifle lights with massive 12v batteries.

The lights come with a set of 3 rechargers, USB for the computer, a car charger as well as a wall charger for your home.

**Half ZOOM SPOT (KOL)  
Nice scanning setting.**

**[www.africanpredator.com](http://www.africanpredator.com)**

**FULL SPOT (KOL) long range**

**Can easily take 300m shots with a 10 power scope, easily.**

**[www.africanpredator.com](http://www.africanpredator.com)**

Light looks white but it is RED, the light is very bright so it just appears white in this photo. With this setting at 300m it will enable you to identify a broadside animal jackal sized through a 10 power scope easily. Remember this spot on the wall looks tiny because it's close, out at 300m it's a lot wider and fast target acquisition is easily possible.
